

KCC 4729.1 (K-C 16,210.1)  
PATENTAMENDMENTS TO THE CLAIMS

This listing will replace all prior versions, and listings, of claims in the application.

## Listing of Claims:

1. (Canceled).
2. (Currently amended) A package as set forth in claim [[1]] 19 wherein the closure is positioned at least about 4 millimeters from the distal edge of the flap.
3. (Original) A package as set forth in claim 2 wherein the closure is positioned about 16 millimeters from the distal edge of the flap.
4. (Currently amended) A package as set forth in claim [[1]] 19 wherein said distal edge is substantially straight and said adhesive closure includes an elongate strip of adhesive material extending substantially parallel to the distal edge of  
5 the packaging flap.
5. (Original) A package as set forth in claim 4 wherein the elongate strip of adhesive material has a width of less than about 20 millimeters.
6. (Original) A package as set forth in claim 5 wherein the strip of adhesive material has a width of more than about 2 millimeters.
7. (Original) A package as set forth in claim 5 wherein the strip of adhesive material has a width of about 7 millimeters.

KCC 4729.1 (K-C 16,210.1)  
PATENT

8. (Original) A package as set forth in claim 4 wherein the strip of adhesive material is substantially continuous and uninterrupted along its entire length.

9. (Original) A package as set forth in claim 4 wherein the flap is substantially rectangular.

10. (Currently amended) A package as set forth in claim [[1]] 19 wherein the adhesive closure extends substantially an entire width of the flap.

11. (Currently amended) A package as set forth in claim [[1]] 19 wherein the adhesive closure is a two sided tape.

12. (Currently amended) A package as set forth in claim [[1]] 19 wherein the adhesive closure is a hot melt adhesive.

13. (Currently amended) A package as set forth in claim [[1]] 19 wherein the flap has an inner face and an outer face, and the adhesive closure is positioned on said inner face of the flap for releasably holding said flap in the closed  
5 position.

14. (Canceled).

15. (Currently amended) A package as set forth in claim 19 [[14]] wherein the plurality of absorbent articles are arranged in a stack.

16. (Canceled).

17. (Currently amended) A package as set forth in claim [[1]] 19 wherein the feminine care product comprises a panty liner.

18. (Currently amended) A package as set forth in claim [[1]] 19 wherein the feminine care product comprises an interlabial pad.

KCC 4729.1 (K-C 16,210.1)  
PATENT

19. (New) A package comprising:

a plural number of individually wrapped absorbent feminine care articles; and

reclosable packaging comprising:

5 a flexible pocket having a hollow interior receiving said plural number of absorbent feminine care articles, the hollow interior of the pocket having a volume which is substantially filled by the plural number of individually wrapped feminine care articles so that the pocket conforms to the articles, said  
10 pocket being of unitary construction;

an opening extending into the hollow interior of the pocket, said opening being sized and shaped for permitting at least one of said plural number of individually wrapped feminine care articles to be withdrawn from said hollow  
15 interior of the pocket;

a flap attached to the pocket and adapted for covering the opening to retain said plural number of individually wrapped feminine care articles in the hollow interior of the pocket, said flap being selectably moveable between an open position in  
20 which the opening is generally unobstructed by said flap to permit said article to be withdrawn through the opening and a closed position in which the flap covers the opening and an exterior area of the pocket to retain said plural number of articles in the pocket and to prevent said plural number of  
25 articles from passing through the opening; and

a reclosable adhesive closure comprising an adhesive material positioned on said package for releasably securing the flap in its closed position on said exterior area of the pocket, the adhesive closure being spaced from a distal edge of  
30 the flap to permit a portion of the flap to be grasped and separated from the pocket without releasing the closure.

KCC 4729.1 (K-C 16,210.1)  
PATENT

20. (New) A package as set forth in claim 19 wherein the adhesive material is positioned on the flap.

21. (New) A package comprising:

a plural number of individually wrapped absorbent feminine care articles; and

reclosable packaging comprising:

5 a flexible pocket having a hollow interior receiving said plural number of absorbent feminine care articles, the hollow interior of the pocket having a volume which is substantially filled by the plural number of individually wrapped feminine care articles so that the pocket conforms to the articles;

10 an opening extending into the hollow interior of the pocket, said opening being sized and shaped for permitting at least one of said plural number of individually wrapped feminine care articles to be withdrawn from said hollow interior of the pocket;

15 a flap attached to the pocket and adapted for covering the opening to retain said plural number of individually wrapped feminine care articles in the hollow interior of the pocket, said flap being selectably moveable between an open position in which the opening is generally unobstructed by said flap to  
20 permit said article to be withdrawn through the opening and a closed position in which the flap covers the opening and an exterior area of the pocket to retain said plural number of articles in the pocket and to prevent said plural number of articles from passing through the opening, the flap being  
25 everywhere free from flush alignment with the pocket in the closed position of said flap; and

a reclosable adhesive closure comprising an adhesive material positioned on said package for releasably securing the flap in its closed position on said exterior area of the

PATENT

30 pocket, the adhesive closure being spaced from a distal edge of the flap to permit a portion of the flap to be grasped and separated from the pocket without releasing the closure.

22. (New) A package as set forth in claim 21 wherein the adhesive material is positioned on the flap.

23. (New) A package comprising:

a plural number of individually wrapped absorbent feminine care articles; and

reclosable packaging comprising:

5 a flexible pocket comprising at least in part a first wall and having a hollow interior receiving said plural number of absorbent feminine care articles, the hollow interior of the pocket having a volume which is substantially filled by the plural number of individually wrapped feminine care articles so  
10 that the pocket conforms to the articles;

an opening extending into the hollow interior of the pocket, said opening being sized and shaped for permitting at least one of said plural number of individually wrapped feminine care articles to be withdrawn from said hollow  
15 interior of the pocket;

a flap attached to the pocket and adapted for covering the opening to retain said plural number of individually wrapped feminine care articles in the hollow interior of the pocket, said flap being selectably moveable between an open position in  
20 which the opening is generally unobstructed by said flap to permit said article to be withdrawn through the opening and a closed position in which the flap covers the opening and a first portion of the first wall of the pocket to retain said plural number of articles in the pocket and to prevent said  
25 plural number of articles from passing through the opening, a

PATENT

second portion of the first wall being uncovered by the flap in the closed position of the flap, the flap being free from flush alignment with said uncovered second portion of the first wall in the closed position of said flap; and

30       a reclosable adhesive closure comprising an adhesive material positioned on said package for releasably securing the flap in its closed position on said exterior area of the pocket, the adhesive closure being spaced from a distal edge of the flap to permit a portion of the flap to be grasped and  
35       separated from the pocket without releasing the closure.

24. (New) A package as set forth in claim 23 wherein the adhesive material is positioned on the flap.
